

Evidence for God from the Existence of Logic

Three Laws of Logic:

The Law of Identity

The Law of Non-Contradiction

The Law of Excluded Middle

The Transcendental Argument:

(1) The Absolute Laws of Logic Exist

The Absolute Laws of Logic Are Conceptual Laws That Govern Mental Processes

The Absolute Laws of Logic Are Transcendent

The Absolute Laws of Logic Pre-Existed Mankind

(2) All Conceptual Laws Reflect the Mind of a Law Giver

(3) The Best and Most Reasonable Explanation for the Kind of Mind Necessary for the Existence of the Transcendent, Absolute, Conceptual Laws of Logic is God

Objections That Atheists Have:

Aren't the "Laws of Logic" simply the 'brute' characteristics of existence?

Aren't the "Laws of Logic" simply the result of observations we make of the world in which we live?

Aren't the Laws of Logic simply human conventions?

Are the "Laws of Logic" truly necessary if a God created them?

Aren't there different kinds of Logic?
